BRADLEY STENCIL MACHINE COMPANY

A. J. BRADLEY
[illegible] NASSAU ST.
NEW YORK

THE Bradley Stencil Machine Company was incorporated in the State of Missouri, November 8, 1893, and having successfully passed through the many vicissitudes incident to the introduction of a new article of merit upon the market, which necessitated an outlay of over a hundred thousand dollars, the Bradley Stencil Machine is now recognized as a standard necessity by the thousands of progressive concerns using them.

These machines are manufactured under patents issued—

APRIL 4, 1893,
JULY 10, 1894,
DECEMBER 25, 1894,
AUGUST 30, 1898,
OCTOBER 25, 1898,
NOVEMBER 1, 1898,
NOVEMBER 22, 1898,
and others pending.

Also patented in Great Britain, France and Germany.

The rights secured by these patents will be defended, and any infringement thereof will be prosecuted as the law prescribes.

The Bradley Stencil Machine

Has been adopted by the United States Government, used in the Post Office, War, Treasury and Navy Departments. It is endorsed by the Railway and Steamship Lines as the Best Marking Method Known.

It has already revolutionized shipping-room methods in many of the leading concerns in every line of commercial business in this country, and has become universally recognized as a standard necessity in marking goods, neatly, quickly, cheaply and artistically.

It does away with expensive brass stencils and saves the time and labor of hand marking, securing neatness and accuracy at a trivial cost, and by uniform marking prevents shipments from going astray.

It makes you independent of stencil merchants and relieves your shipping clerk of the drudgery of hand work, opening up new possibilities in marking, giving not only the name and address of the consignee, but also the routing, weight and number, and description of contents of every box, barrel, crate or other package, as well as advertising schemes.

It reduces the cost of stencils so low that it is cheaper to cut one for each shipment (of from one to five hundred packages) and discard it after completing the shipment, than to hunt up old stencil previously used, and as paper stencil board is used instead of brass, tin or other metal, the cost of stencils is reduced to a minimum.

It is equipped with forty characters, works automatically, and may be successfully operated by any boy or porter after fifteen minutes practice, and the longest brand can be cut in a few seconds, effecting an immense saving of time and labor.

It is built of the best material and by the best mechanics and expensive special tools that money can obtain, and is equipped with interchangeable parts throughout.

It is simple and easy to operate and care for, and fully guaranteed. We point with justifiable pride to every owner of a Bradley Stencil Machine as the best endorsement any one could ask for.

It sells strictly upon its merits and requires no expert to start it.

It is a veritable typewriter for the shipping-room, fulfilling in that department the mission of the writing machine in the counting room; it has the advantage, however, of saving labor, instead of increasing your pay-roll.

The Bradley Stencil Machine Co.,

St. Louis, Mo.

Gentlemen:--

We take pleasure in advising you that the Stencil Cutting Machine, which we purchased from you about two years ago, is still giving very satisfactory service; in fact, the machine is as good today as when new, although in almost constant use during business hours. It has, as yet, not cost us a penny for repairs.

We have found it to be a great time and labor saver and it is everything that you claimed for it. In our opinion the work produced by this machine is far superior to any hand marking we have ever seen.

Yours truly,

H. J. HEINZ CO.

Gentlemen:

We have yours of the 22nd, and in reply beg to state that the machine sold us recently is giving perfect satisfaction. We would not take $500.00 for this machine, if we could not get another one like it. Our machine has now been in use more than a year and is in perfect order. We appreciate your kind offer to send us any repair part, but as the writer gives the machine his personal attention, it is not in need of any of these parts because it is taken care of and we believe with proper attention given the machine in cutting of stencils, etc., it will last a number of years without repairs. We find no trouble whatever in the stenciling of our bbl and sack flour with stencils cut with this machine. At first our men did not like the idea of marking in full, but they soon became used to the stencils, and we now make better headway than we did when we used the single mark. We also wish to state that we have not lost a single shipment in transit since we introduced your machine.

WE REPLY TO YOURS OF

IN ANSWERING THIS PLEASE STATE-FOR L. B. T.

Dear Sirs

In answer to your inquiry as to our experience with the Bradley Stencil Machine, will say that we have had one in use for nearly two years, and have found it a very great convenience. We have found it to be a saving not only in expense, but in time, and can heartily recommend it to any concern that uses a good many stencils.

Our practice is to throw away stencils after using them, as it is cheaper to make new ones than take care of the old ones.

Yours truly,

Mansur & Tebbetts Implement Co

Dear Sirs,

We have your letter of June 7th and we have been using the old pattern stencil machine since it has been received and has been giving us the very best of satisfaction. Although the new one may be an improvement, we see no reasons for making a change at the present.

Very respectfully yours,

THE POPE MANUFACTURING CO.

Gentlemen:--

The Stencil Machine which we bought of you with considerable hesitation proves to be a very great convenience and greatly reduces the expense of oue shipping department. It has become as indispensable as any machine we have in our business. Now that we have it we do not know how we could well get along without it.

Yours truly,

Hamilton Brown Shoe Co.

Gentlemen,

Replying to your favor of January 24th, will say that we have had one of your Stencil Machines in use a little over a year, and in that time we have marked more than 300,000 cases of goods with Stencils cut with this machine, with very satisfactory results. We believe that it has saved us its original cost in one year, and seems to be in just as good condition now as when we first received it.

Very truly yours,

Goodyear's Metallic Rubber Shoe Co.

Bradley Stencil Co.,
St. Louis, Mo,

Gentlemen:--

After a thorough trial of your machine, it is with pleasure that we write you of the satisfaction that it has given us. It not only expedites the shipping of our goods, as well as vastly improves the appearance of the cases when shipped, and thus makes the address unmistakably clear, but we have no doubt the favorable appearance of the boxes when received by our customers creates a good impression to begin with. We are pleased to recommend your machine to any one in need of an article of this kind.

Yours truly,
J. B. Lewis Co.

Dear Sir.

You put one of your Bradley Stencil Machines in our shipping room about a month ago rather against our judgement. We thought at the time it was an expensive luxury. We have found it so useful, however, that we would not now care to get along without it. You will please have your company send us a bill for it.

Very truly yours,

Gentlemen,--

The machine which we ordered of you, arrived safely, and we now have it in operation in our shipping department. To say we are pleased with it would be stating the case mildly. After using the machine, which you first sent us on trial, we came to the conclusion that it was a necessity, and we would not do without it for double its cost, provided we could not obtain another.

Thanking you for the courteous treatment received at your hands in our recent dealings, we beg to remain,

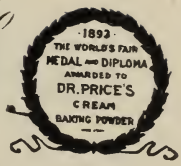

Yours respectfully,
Argo Manufacturing Co.,

Gentlemen:-

Your favor of the 1st inst. received and noted. We have been using you stencil machine steadily, and find that it works as satisfactorily to-day as it did when we put it in. Our shipper reports that the machine is a great time saver, particularly on local shipments, consisting of a large number of packages. We find that he can to-day with the aid of your machine mark five boxes where by hand he could mark only one. We are much pleased with the machine.

Very truly yours, Cleveland Window Glass Co.,
